FOOD WORKS

Delicious, nutritious ready meals

At Food Works, we turn surplus food into delicious, nutritious meals - and make them accessible to everyone on a pay what you can basis. The minimum contribution is £1 per meal, but we encourage people to pay more if they're able - every penny goes back into supporting the work we do.

As well as running two of our own cafes and markets, we partner with local community spaces to expand access to our tasty, affordable meals through our Community Hubs.

All you need is:

- A freezer
- A space where people can collect meals at least once a week
- A bank card to transfer takings
- An email address for your account

Choose the hub option that works for you:

If your organisation is interested in offering affordable, sustainable meals to your local community, there are two ways you can get involved.

1. Order & Delivery Hub

If you will be regularly ordering 20 meals or more. You can:

- Order through our website
- Have meals delivered to your hub on a chosen day of the week
- Distribute the meals to your community using our pay what you can model
- Keep track of takings and transfer funds to us through our website (including any extra contributions)

2. Collection Hub

If you need less than 20 meals per order, then being a collection hub is perfect for more flexible or smaller-scale operations. You can:

- Collect meals from one of our cafes or Handsworth market as and when you need them
- Pay at the till on collection (including anything collected above the £1 minimum from your previous batch of meals)
- Distribute the meals to your community using our pay what you can model

Ready to get started?

Contact us to begin your Just Meals journey and help make good food accessible to everyone in your community. We're here to support you every step of the way: info@thefoodworks.org

Looking for existing hubs?

Head over to our [Community Partners page](#) to see where all our cafes, markets, community hubs and pop up markets are located.
